

# VIDEO REVIEW REPORT

Video: Reference Sample 1 - Interview.mp4

Duration: 01:10 (mm:ss)

Detected Change Candidates: 68

# Start with the Navigation Report

This report does not attempt to explain why each visual change happened. Its purpose is to reduce blind review by surfacing change-based navigation points.

[Go to Navigation Report](#)

Use the Navigation Report for a faster first pass. From each highlighted navigation point, you can move to nearby detected changes without scanning the full list from the beginning.

Recommended flow: Navigation Report first → jump between highlighted navigation points → inspect the full change-candidate list only when you need more local context.

The full candidate list remains available when you want to inspect surrounding frames, nearby non-highlighted changes, or transcript context.
